The presentation will cover OSHA regulations, Basic Site Assessment, Mechanical Installation, and PV Systems, Electrical Installation and standard Operation and Maintenance needs. If you are interested in becoming a certified photovoltaic installer – this one of the session’s at the Summit you need to attend.

Presenter Biography:

Walt Novash

Walt Novash is a Program Manager for Renewable Energy at Johnson Controls, specializing in photovoltaic (PV) energy systems.

At Johnson Controls his duties include technical support on PV projects and also internal education for Johnson Controls sales, engineering, and service staff.

Prior to coming to Johnson Controls, he worked as a PV project manager, system designer, and installer for two other solar firms in Wisconsin. He is a NABCEP-certified PV installer.
